ACNOWLEDGEMENT

We would like to express our profound thanks to all those who helped in making this project a reality. Much needed moral support and encouragement was provided on numerous occasions by all teachers and fellow students.

We are thankful to our Head of the Department. We are also especially grateful to our teacher and project guide Mrs. Rajeshri Gaikwad for his time to time, much needed, valuable guidance. she has been available to help us whenever required. she has been our guiding star, guiding us through the right direction to make this project a success. Without his full support and cheerful encouragement we would have not been able to complete the project in time. We are sincerely thankful to him.

Last but not the least we would like to thank our fellow student for providing their support to us in different ways.

INTRODUCTION

In a modern generation Online food ordering is a mobility of food delivery or takeout from a local restaurant or food cooperative. Now days the rapid growth in the use of internet and the technologies associated with it, the several opportunities are coming up on the web or mobile application. This is made possible through the use of electronic payment system. The payment can be done through the customer's credit card, debit card. It is possible for everyone to order any goods from anywhere the internet and have the goods delivered at his/her home. All types made be internet le transaction ads to the economic of digital cash, the necessary tool for this process telecommunication with customers.

The system will become an important tools use for restaurant to improve the management aspect by use of computer system to connected each and every food ordering transaction instead of data record on it. In addition, it can also provide efficiency for the restaurant by reducing time consuming, minimize human errors or delivery and providing good quality and service to customers. In terms of the integrity and availability of the system provided, it can be concluded that this system is a suitable solution.

OBJECTIVE

The main objective of the Project on Online Food Ordering System is to manage the details of Food, Item Category, Shopping Cart, Customer, Order. It manages all the information about Food, Delivery Address, Order, Food. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Food, Item Category, Delivery Address, Shopping Cart. It tracks all the details about the Shopping Cart, Customer, Order.

The study has the following specific objectives :-

- To develop a system that will surely satisfied the customer service.
- To design a system able to accommodate huge amount of orders at a time.
- To evaluate its performance and acceptability in terms of security, user-friendliness, accuracy and reliability
- To improve the communication between the client and the server and minimize the time of ordering.

THE EXISTING SYSTEM

DESCRIPTION OF EXISTING SYSTEM :-

- Many of customer's placed the order for their foods for their ongoing events .
- It is very difficult to maintain the record each and every customer's, customers transactions manually by paper.
- The new System Overcome this problem, by computerizing transactions and providing easy backup of the data time to time.

DRAWBACKS OF THE EXISTING SYSTEM :-

- Data security .
- Risk of losing customer's data .
- Chances of a technical problem in the system .
- Mismatch data of orders, customers and drivers .
- Difficulty in choosing the right developer to develop a customized system .
- More man power.
- Time consuming.
- Consumes large volume of pare work.
- Needs manual calculations.

THE PROPOSED SYSTEM

SCOPE OF THE PROPOSED SYSTEM :-

The proposed system is designed to overcome the limitations of existing system. By computerizing the system, human errors will be rectified to the maximum thereby enhancing the efficiency of the system. The obsolete system of manual entry and calculation can be removed and this method could be adopted to bring into action a more efficient system. It may help collecting perfect management in details. In a very short time, the collection will be obvious, simple and sensible. It also helps in current all works relative to Online Food Ordering System. It will be also reduced the cost of collecting the management & collection procedure will go on smoothly .

- In computer system the person has to fill the various forms & number of copies of the forms can be easily generated at a time.
- In computer system, it is not necessary to create the manifest but we can directly print it, which saves our time.
- To utilize resources in an efficient manner by increasing their productivity through automation.
- The system generates types of information that can be used for various purposes.
- It satisfy the user requirement
- Be easy to understand by the user and operator
- Be easy to operate
- Have a good user interface
- Be expandable

BENEFITS OF THE PROPOSED SYSTEM :-

The aim of proposed system is to develop a system of improved facilities. The proposed system can overcome all the limitations of the existing system.

- **Fully automated and hence reduces human errors and investments.**
- **Customer's queue is minimized because of the automated system.**
- **Security to the data is given by providing password at various stages.**
- **Flexibility in technology and Implementation.**
- **Easier to maintain, Edit and Update records.**
- **The system provides proper security and reduces the manual work.**
- **Security of data.**
- **Ensure data accuracy's.**
- **Proper control of the higher officials.**
- **Minimize manual data entry.**
- **Minimum time needed for the various processing.**
- **Greater efficiency.**
- **Better service.**
- **User friendliness and interactive.**
- **Minimum time required.**

FEASIBILITY STUDY :-

After doing the project Online Food Ordering System, study and analyzing all the existing or required functionalities of the system, the next task is to do the feasibility study for the project. All projects are feasible - given unlimited resources and infinite time. Feasibility study includes consideration of all the possible ways to provide a solution to the given problem. The proposed solution should satisfy all the user requirements and should be flexible enough so that future changes can be easily done based on the future upcoming requirements.

A . Economical Feasibility :-

This is a very important aspect to be considered while developing a project. We decided the technology based on minimum possible cost factor.

- All hardware and software cost has to be borne by the organization.
- Overall we have estimated that the benefits the organization is going to receive from the proposed system will surely overcome the initial costs and the later on running cost for system.

B . Technical Feasibility :-

This included the study of function, performance and constraints that may affect the ability to achieve an acceptable system. For this feasibility study, we studied complete functionality to be provided in the system, as described in the System Requirement Specification (SRS), and checked if everything was possible using different type of frontend and backend platforms.

C. Operational Feasibility :-

No doubt the proposed system is fully GUI based that is very user friendly and all inputs to be taken all self-explanatory even to a layman. Besides, a proper training has been conducted to let know the essence of the system to the users so that they feel comfortable with new system. As far our study is concerned the clients are comfortable and happy as the system has cut down their loads and doing.

HARDWARE AND SOFTWARE REQUIREMENT

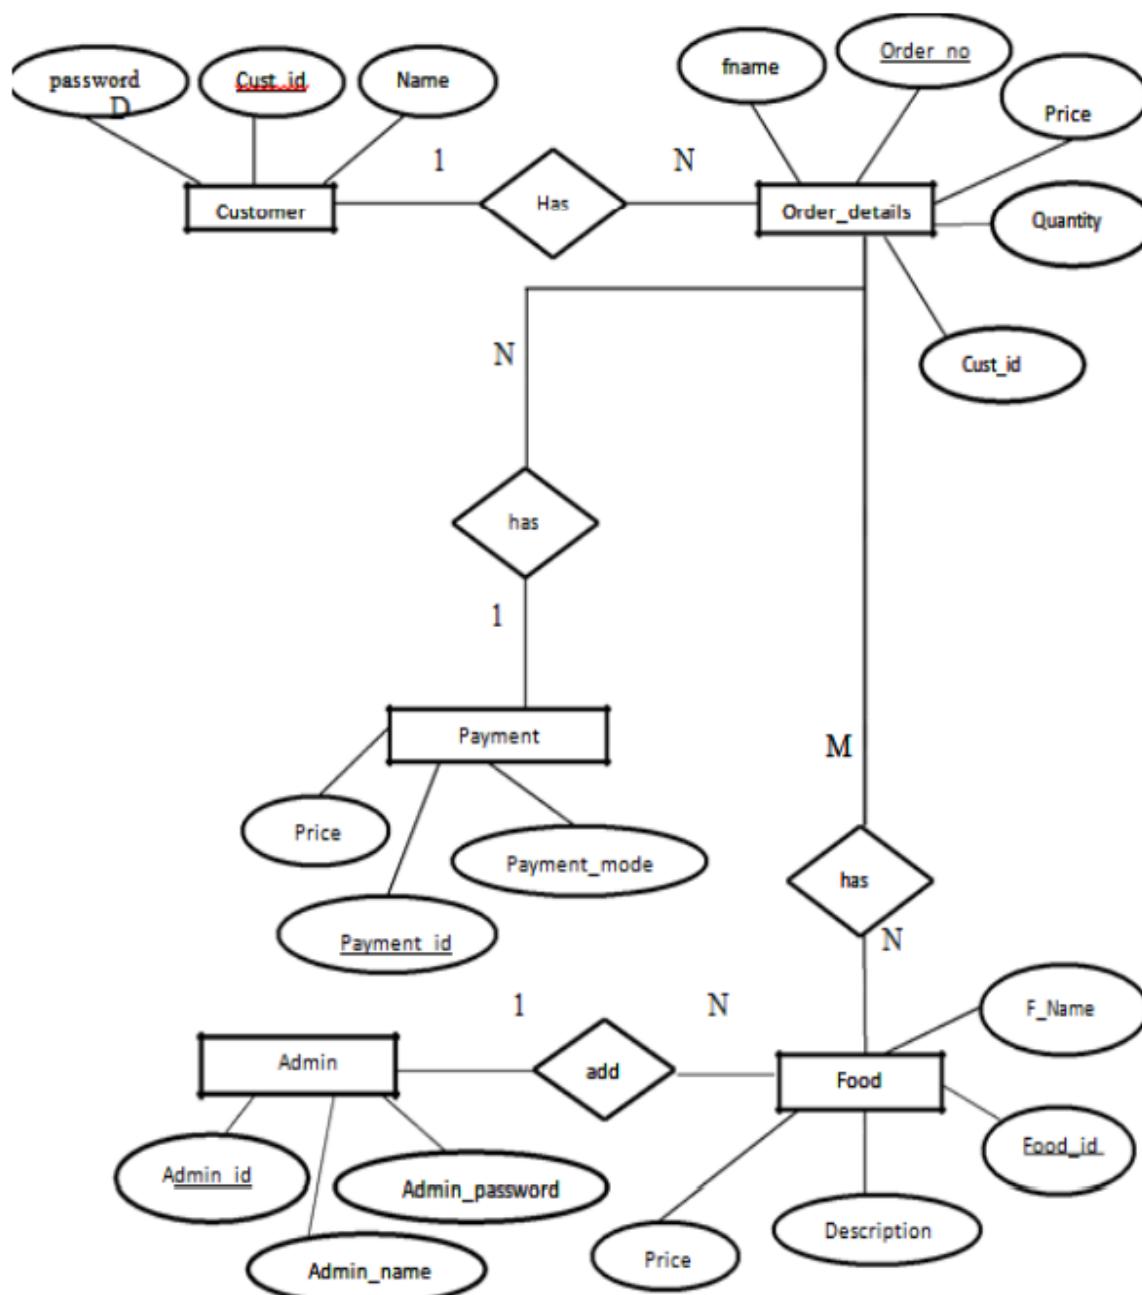

Hardware requirements :-

<u>Description</u>	<u>Required</u>
Processor	Pentium III 630MHz
Ram	128 MB
Hard Disk	20 GB
Moniter	15 inches Colour Moniter
Keyboard	122 Keys
Operating System	64 Bit

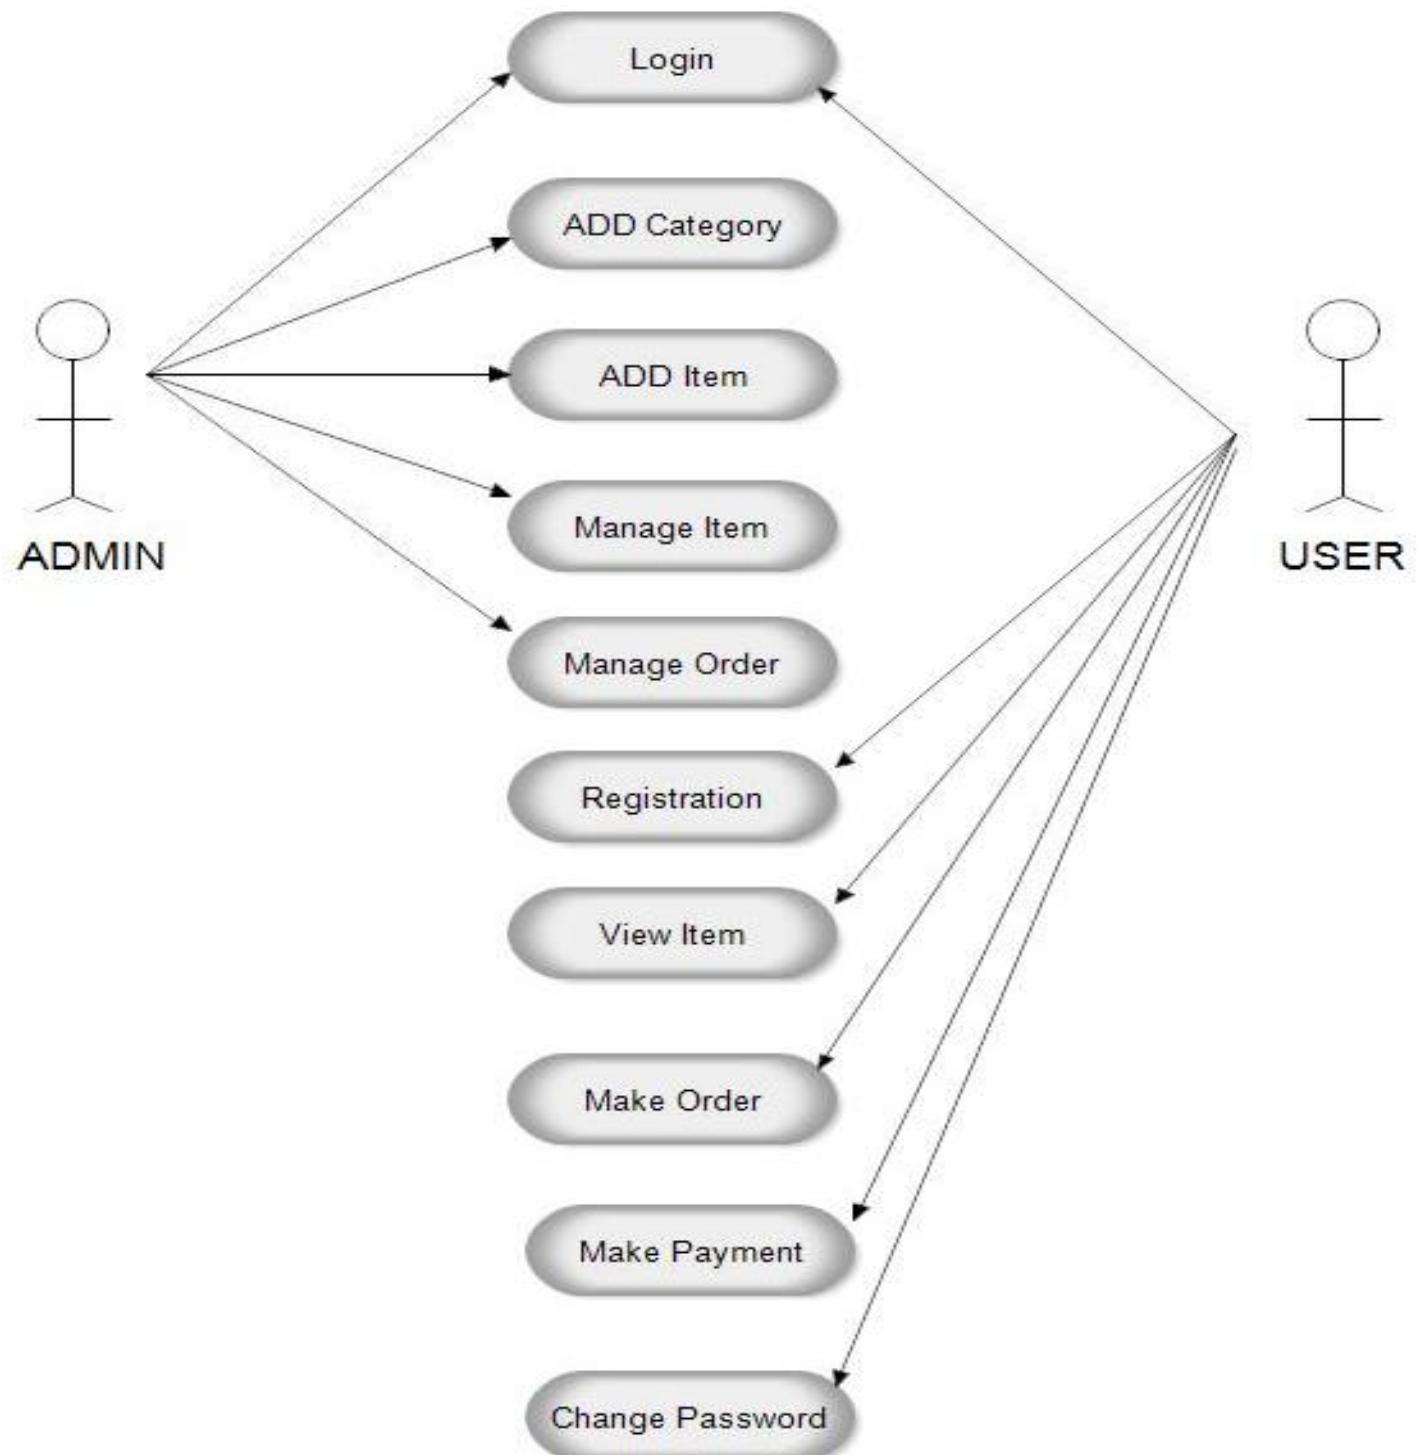

Software requirements :-

Server	Apache 2.4.5
Front-end	Html , Css , Bootstrap , Ajax, Jquery
Back-end	PHP 8.4.1, PostgreSQL 5.5.32 (using phpmyadmin 5.1.3)
Integrated Development Environment (IDE)	Netbeans 7.3.1
Platform	Windows 10

Screen Shorts of website :-

Website interface

The screenshots illustrate the Foodpick4 website interface, showcasing its user-friendly design and various features:

- Homepage:** Features a large banner with the text "Order Delivery & Take-Out" and "Food restaurants, sandwiches, and cocktails for now". Below the banner are three sections: "Create Your Account", "Call Us Now", and "Delivery at Your Door".
- Popular Dishes of the Month:** A section titled "Popular Dishes of the Month" with the subtext "The easiest way to your favourite food". It displays three dishes with their names, descriptions, prices, and "Order Now" buttons:
 - Bonefish:** Three pieces of lightly sautéed fresh fillets. Price: \$55.77.
 - Hard Rock Cafe:** A mix of cheddar biscuits, shredded cheese, & bacon rolls. Price: \$22.12.
 - Uno Pizzeria & Grill:** Kids love cheese their pizza shape, toppings like ham, pepperoni.
- Easy 3 Step Order:** A diagram illustrating the ordering process:
 - Choose a restaurant
 - Choose a tasty dish
 - Pick up or DeliveryWith the subtext: "We've got your covered with menus from over 1000 delivery restaurants online.", "Then you have to choose your favorite food online and place the order and make the payment.", and "Get your food delivered. And enjoy your meal! Pay online on arrival of delivery."
- Pay by Cash on delivery**: An option mentioned above the city skyline graphic.
- Featured restaurants:** A grid of five restaurant cards with their names, addresses, ratings, and reviews:
 - Hari Nonveg Restaurant:** Hari Nonveg Restaurant, Juhu Beach - 17545. 4.5 stars, 10 reviews.
 - Arkay Pasta Center:** Arkay Pasta Center, Juhu Beach + Mahim Beach, Mumbai - 144009. 4.5 stars, 10 reviews.
 - hudson Spices:** Opposite Laxmi Sweets, Nakshatra Road, Andheri East, Mumbai - 400051. 4.5 stars, 10 reviews.
 - The Great pizza Factory:** The Great pizza Factory, Hotel Airport, NH-8, Navi Mumbai - 400077. 4.5 stars, 10 reviews.
 - Martini Foods:** Martini Foods, 595, 1st Floor, Agape Residency, Model Town - 25. 4.5 stars, 10 reviews.
 - Karunya store:** Karunya store, Colaba, Mumbai - 400005. 4.5 stars, 10 reviews.
- The Best Food Delivery App:** A red banner with the text "Now you can make food happen pretty much wherever you are thanks to the free easy-to-use Food Delivery & Takeout App". It includes download links for Apple and Google Play.
- Footer:** Contains links to "About Us", "How It Works", "Pages", "Popular locations", "Payment Options", "Address", "Phone", and "Additional Information".

Singup Screen at startup of website :-

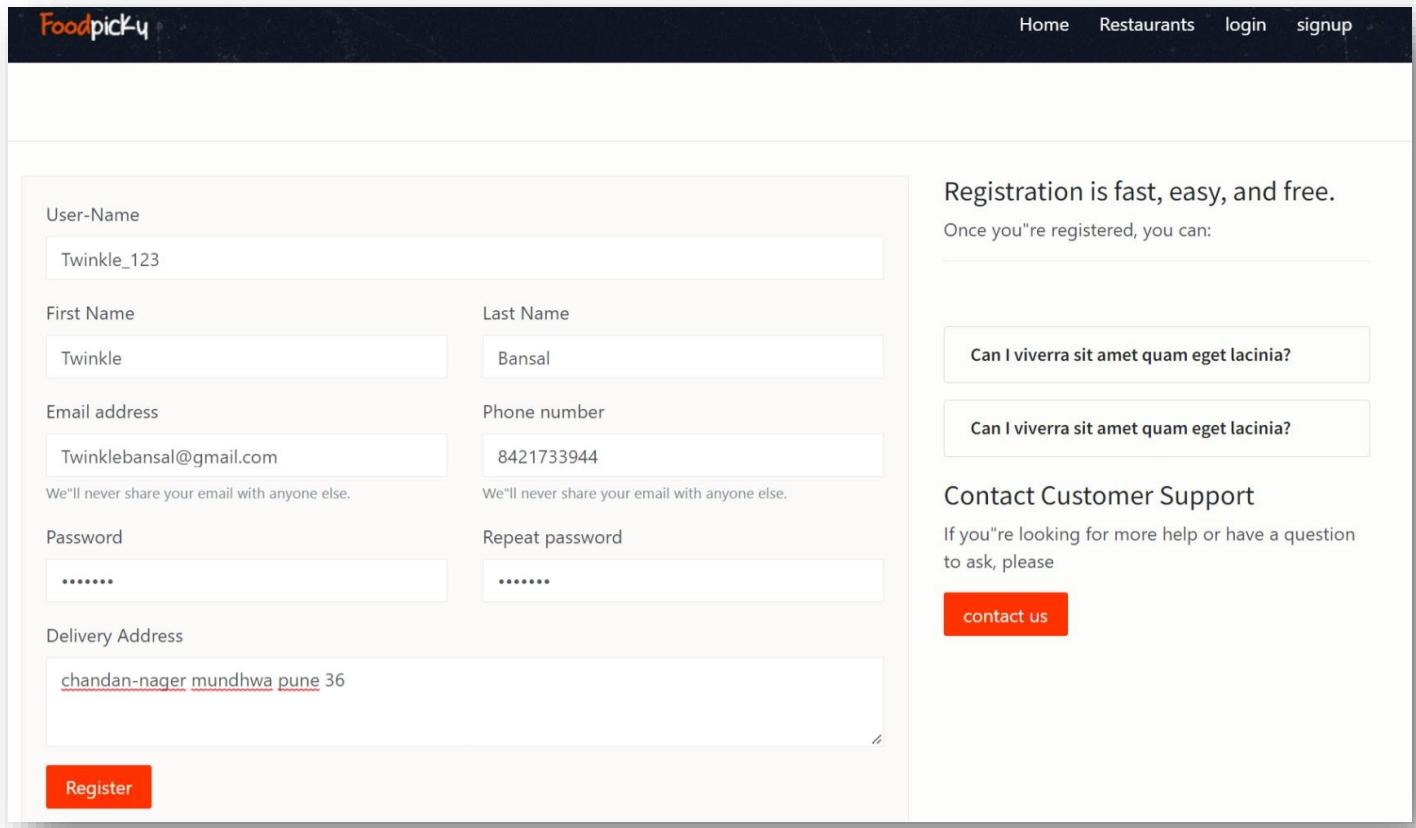

The screenshot shows a sign-up form for a website called "Foodpicky". The form includes fields for User-Name, First Name, Last Name, Email address, Phone number, Password, and Repeat password. A "Delivery Address" field is also present. A red "Register" button is at the bottom. The page features a dark header bar with navigation links for Home, Restaurants, login, and signup.

All fields must be Required!

CONFIRM YOUR FOOD

ORDER :-

The screenshot shows a web browser window for an online food ordering system. The URL in the address bar is `localhost/online-food-ordering-system-in-php-master/checkout.php`. A modal dialog box is centered on the screen with the title "localhost says" and the message "Are you sure?". Below the message are two buttons: "OK" (blue) and "Cancel" (gray). In the background, the main page displays a "Cart Summary" table:

Cart Summary	
Cart Subtotal	\$147.01
Shipping & Handling	free shipping
Total	\$147.01

Below the table, there are two payment options: "Payment on delivery" (selected, indicated by a red circle) and "Paypal" (indicated by a blue circle). The "Paypal" option includes icons for VISA, MasterCard, American Express, and Discover. At the bottom of the page is a large green button labeled "Order now".

SUCCESSFUL TRANSACTION

THE ORDER IS PLACED :-

The screenshot shows a successful order placement on the Foodpicky website. At the top, there is a navigation bar with links for Home, Restaurants, your orders, and logout. Below the navigation bar, three steps are outlined: 1. Choose Restaurant, 2. Pick Your favorite food, and 3. Order and Pay online. A green success message states "Thankyou! Your Order Placed successfully!". The Cart Summary table shows the following details:

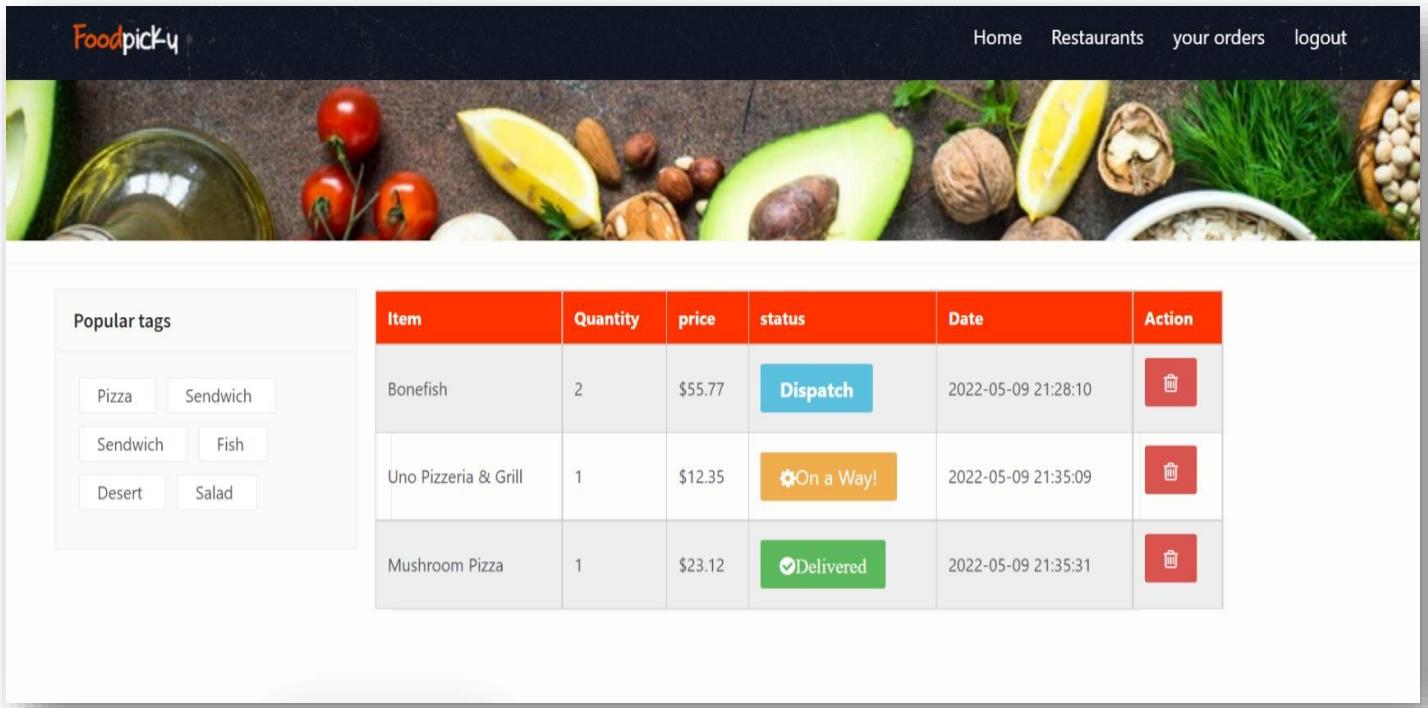

Cart Subtotal	\$147.01
Shipping & Handling	free shipping
Total	\$147.01

Payment options are listed as "Payment on delivery" with a note to send a cheque and "Paypal" with icons for VISA, MasterCard, American Express, and Discover.

Order now

TRACK YOUR FOOD

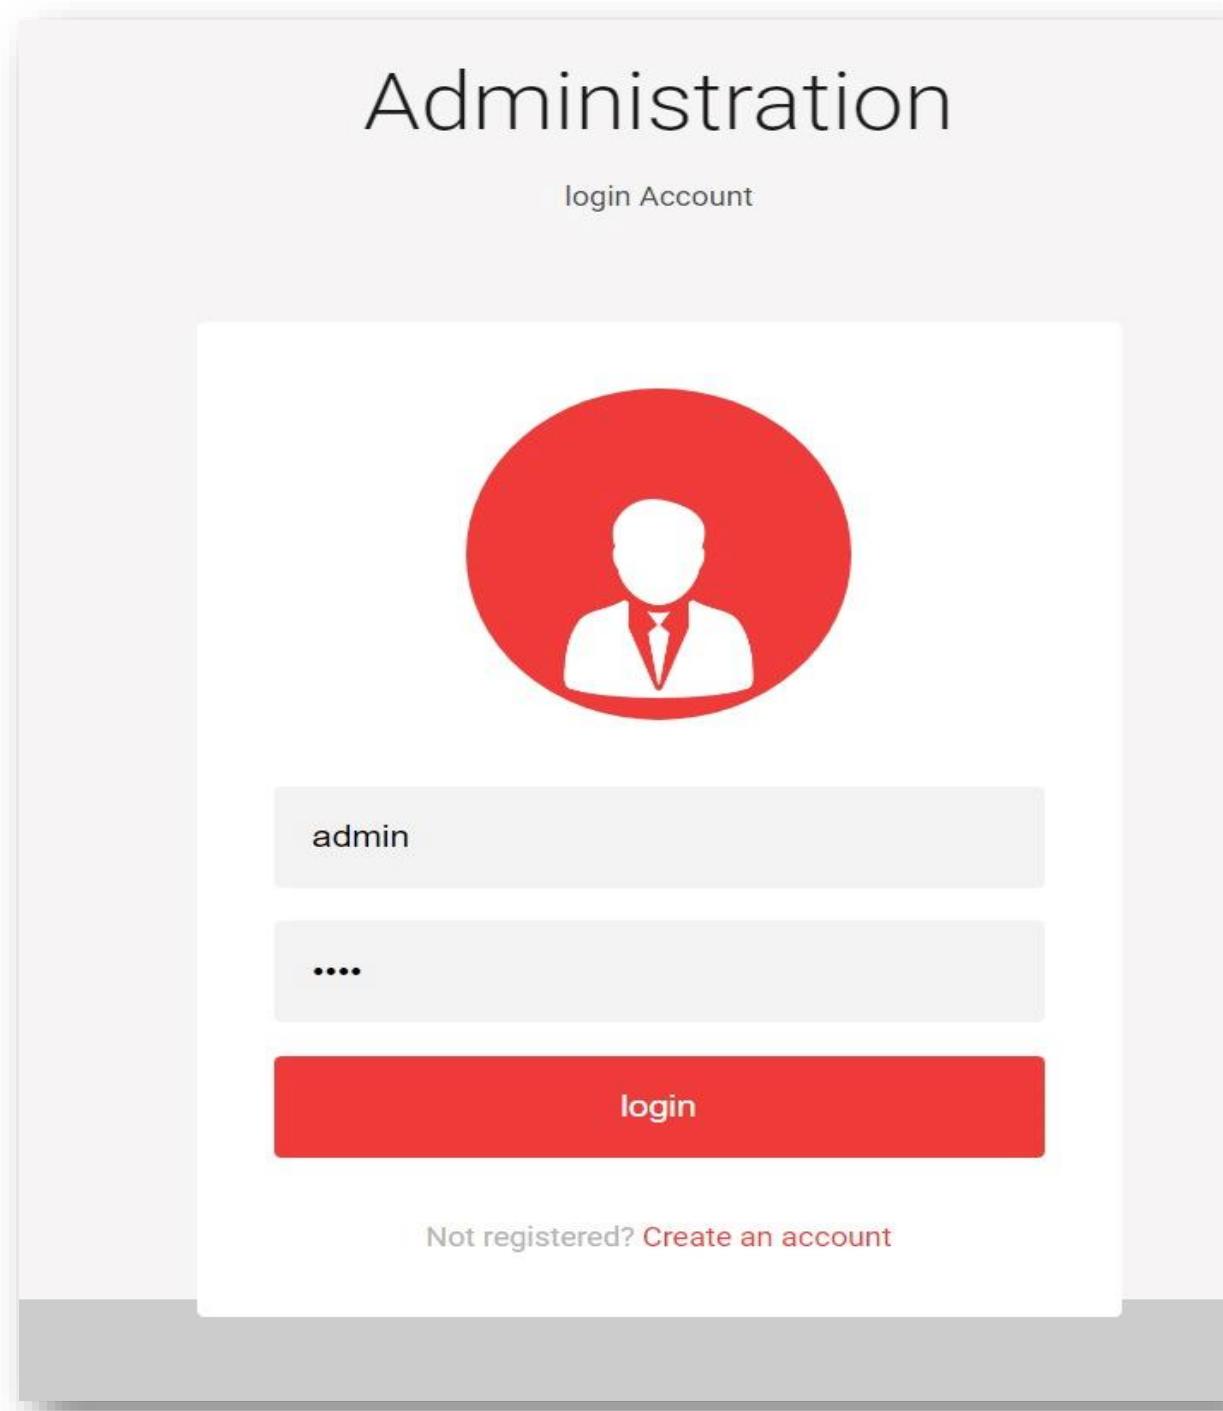

ORDER :-

The image shows a screenshot of a food delivery tracking application named "Foodpicky". The top navigation bar includes links for Home, Restaurants, your orders, and logout. Below the navigation is a decorative header image featuring various fresh ingredients like avocados, tomatoes, nuts, and herbs. On the left, there's a sidebar titled "Popular tags" with buttons for Pizza, Sendwich, Fish, Desert, and Salad. The main content area displays a table of three recent orders:

Item	Quantity	price	status	Date	Action
Bonefish	2	\$55.77	Dispatch	2022-05-09 21:28:10	
Uno Pizzeria & Grill	1	\$12.35	On a Way!	2022-05-09 21:35:09	
Mushroom Pizza	1	\$23.12	Delivered	2022-05-09 21:35:31

UPDATE THE USER :-

The screenshot shows the 'Update Users' form within the ElaAdmin dashboard. The left sidebar includes links for HOME, Dashboard, LOG, Users, Store, Menu, and Orders. The main area has a title 'Update Users'. It contains four input fields: 'Username' (Priya_123), 'First-Name' (Priya), 'Last-Name' (Jadhav), and 'Email' (priya@gmail.com). Below these are 'Password' (a7a3ca1c7c2cbc3786c738696a9855ca) and 'Phone' (9012345634). At the bottom are 'save' and 'Cancel' buttons.

AFTER SUCCESSFULLY ADD THE USER :-

The screenshot shows the 'Update Users' form with a prominent blue banner at the top stating 'congrets ! new user updated sucessfully!'. The rest of the form is identical to the previous one, with 'Username' (Sayali_123), 'First-Name' (Sayali), 'Last-Name' (Throat), 'Email' (sayali@gmail.com), 'Password' (a7a3ca1c7c2cbc3786c738696a9855ca), and 'Phone' (9012345634). The 'save' and 'Cancel' buttons are at the bottom.

DISPLAY UPDATED USER ON DASHBOARD :-

The screenshot shows the ElaAdmin dashboard interface. On the left, there is a sidebar with navigation links: HOME, LOG, and STORE. Under LOG, there are links for Users (with sub-links for All Users and Add Users), Menu, and Orders. Under STORE, there are links for Dashboard, Store, Menu, and Orders. The main content area is titled "Dashboard" and displays a table titled "All Registered users". The table has columns for Username, First-Name, Last-Name, Email, Phone, Address, Reg-Date, and Action. It shows two entries:

Username	First-Name	Last-Name	Email	Phone	Address	Reg-Date	Action
Akshata_123	Akshata	Shirwale	akshatashirwale@gmail.com	8421733944	Sasane-colony keshvnagar mundhwa pune 36	2022-05-11 21:59:21	Delete Edit
Sayali_123	Sayali	Throat	sayali@gmail.com	9012345634	kumbher-vada yerwada pune 36	2022-05-13 01:12:01	Delete Edit

At the bottom of the table, it says "Showing 1 to 2 of 2 entries". There are navigation buttons for Previous, Next, and a page number 1.

AFTER SUCCESSFULLY DELETED USER :-

The screenshot shows the ElaAdmin application interface. On the left is a sidebar with navigation links: HOME, Dashboard, LOG, Users (with sub-links All Users and Add Users), Store, Menu, and Orders. The main content area displays a table of users. The columns are: Username, First-Name, Last-Name, Email, Phone, Address, Reg-Date, and Action. Two rows of data are shown:

Username	First-Name	Last-Name	Email	Phone	Address	Reg-Date	Action
Akshata_123	Akshata	Shirwale	akshatashirwale@gmail.com	8421733944	Sasane-colony keshvnagar mundhwa pune 36	2022-05-11 21:59:21	Delete Edit
Priya_123	Priya	Jadhav	priya@gmail.com	9012345634	Vadgaon Sheri Pin Code is 411014.	2022-05-13 00:25:41	Delete Edit

At the bottom of the table, it says "Showing 1 to 2 of 2 entries". Below the table, there are buttons for "Previous", "1", and "Next".

SEARCH EXISTING USER :-

The screenshot shows the ElaAdmin application interface. On the left is a sidebar with navigation links: HOME, Dashboard, LOG, Users (with sub-links All Users and Add Users), Store, Menu, and Orders. The main content area displays a table of users under a section titled "All Registered users". The columns are: Username, First-Name, Last-Name, Email, Phone, Address, Reg-Date, and Action. One row of data is shown:

Username	First-Name	Last-Name	Email	Phone	Address	Reg-Date	Action
Akshata_123	Akshata	Shirwale	akshatashirwale@gmail.com	8421733944	Sasane-colony keshvnagar mundhwa pune 36	2022-05-11 21:59:21	Delete Edit

At the top right of the main area, there is a search bar with the text "Search: Akshata". Below the table, it says "Showing 1 to 1 of 1 entries (filtered from 2 total entries)". Below the table, there are buttons for "Previous", "1", and "Next".

ADD RESTAURANT

CATEGORY :-

The screenshot shows the elAdmin dashboard interface. On the left is a sidebar with navigation links: HOME, Dashboard, LOG, Users, Store (with sub-links All Stores, Add Category, Add Restaurant), Menu, and Orders. The main area is titled 'Dashboard' and contains a purple header bar with the text 'Add Restaurant Category'. Below this, there is a form field labeled 'Category' containing the value 'momos'. At the bottom of the form are two buttons: 'save' (in green) and 'Cancel'. Below the form, under the heading 'Listed Categories', is a table displaying six rows of category data:

ID#	Category Name	Date	Action
11	Burger	2022-05-12 00:06:09	Delete Edit
9	fish	2018-04-15 00:14:33	Delete Edit

5	grill	2018-04-15 00:15:28	Delete Edit

AFTER SUCCESSFULLY ADDED THE RESTAURANT CATEGORY :-

The screenshot shows the ElaAdmin dashboard interface. On the left, there is a sidebar with navigation links: HOME, Dashboard, LOG, Users, Store (with sub-links All Stores, Add Category, Add Restaurant), Menu, and Orders. The main content area is titled "Dashboard". A teal notification bar at the top says "Congrats! New Category Added Successfully." Below it, a purple header bar says "Add Restaurant Category". Underneath, there is a form field labeled "Category" containing "momos", with "save" and "Cancel" buttons. At the bottom, there is a section titled "Listed Categories" with a table:

ID#	Category Name	Date	Action
12	momos	2022-05-14 14:07:49	
11	Burger	2022-05-12 00:06:09

UPDATE RESTAURANT CATEGORY :-

The screenshot shows a web application interface for 'elaAdmin'. On the left, there's a sidebar with links for HOME, LOG, and various administrative functions like Dashboard, Users, Store, Menu, and Orders. The main area is titled 'Dashboard' and contains a purple header bar with the text 'Update Restaurant Category'. Below this, there's a form field labeled 'Category' containing the value 'momos'. At the bottom of the form are two buttons: a teal 'save' button and a black 'Back' button. A small copyright notice at the bottom states 'All 2022 © Copyright Reserved By Miss.Akshata Shirwale'.

AFTER SUCCESSFULLY UPDATED THE RESTAURANT CATEGORY :-

This screenshot shows the same 'elaAdmin' dashboard after the update. The purple header bar now displays a green success message: 'Updated! Successfully.' The rest of the interface is identical to the previous screenshot, with the 'Category' field now containing 'Noodles' and the same 'save' and 'Back' buttons. The copyright notice at the bottom remains the same.

ADD NEW RESTAURANT :-

The screenshot shows the ElaAdmin dashboard interface. On the left, there's a sidebar with navigation links: HOME, LOG, Store (with sub-links All Stores, Add Category, Add Restaurant), Menu, and Orders. The main area is titled 'Dashboard' and contains a 'Add Restaurant' form. The form fields include:

- Restaurant Name: Kwality Hotel
- Bussiness E-mail: Kwality@gmail.com
- Phone: 111-000-3333
- website URL: Kwalityhotel.com
- Open Hours: 6am
- Close Hours: 7pm
- Open Days: mon-wed
- Image: Choose File ak.png
- Select Category: Noodles
- Store Address: Mangaldas Rd, Sangamvadi, Pune, Maharashtra 411001

At the bottom of the form are two buttons: 'save' (in a green box) and 'Cancel'.

AFTER SUCCESSFULLY ADDED THE NEW RESTAURANT :-

The screenshot shows a web-based restaurant management system interface. On the left, a sidebar menu lists 'HOME', 'Dashboard', 'LOG', 'Users', 'Store' (with 'All Stores', 'Add Category', 'Add Restaurant' options), 'Menu', and 'Orders'. The main area is titled 'Dashboard' and displays a green success message: 'Congrats! New Restaurant Added Successfully.' Below this, a purple header bar says 'Add Restaurant'. The form fields include:

- Restaurant Name: Kwality Hotel
- Bussiness E-mail: Kwality@gmail.com
- Phone: 111-000-333
- website URL: Kwalityhotel.com
- Open Hours: 6am
- Close Hours: 7pm
- Open Days: mon-wed
- Image: Choose File ak.png
- Select Category: Noodles
- Store Address: Mangaldas Rd, Sangamvadi, Pune, Maharashtra 411001

At the bottom are 'save' and 'Cancel' buttons.

UPDATE RESTAURANT :-

The screenshot shows a web-based administration interface for a restaurant system. The top navigation bar includes a logo for 'ElaAdmin', a search icon, and notification icons for messages and alerts. The left sidebar lists navigation options: HOME, Dashboard, LOG, Users, Store, Menu, and Orders. The main content area is titled 'Dashboard' and displays a success message 'Record Updated!'. Below this, the 'Update Restaurant' form is displayed. The form fields include:

- Restaurant Name:** Martini Foods
- Bussiness E-mail:** martinFoods@gmail.com
- Phone:** 345-434-5654
- website URL:** martinFoods.com
- Open Hours:** --Select your Hours--
- Close Hours:** --Select your Hours--
- Open Days:** --Select your Days--
- Image:** Choose File No file chosen
- Select Category:** --Select Category--
- Store Address:** 399 L Near Apple Showroom, Model Town.

At the bottom of the form are two buttons: a teal-colored 'save' button and a dark grey 'Cancel' button.

ADD MENU TO THE RESTAURANT :-

The screenshot shows a user interface for adding a new menu item. On the left is a sidebar with navigation links: HOME, LOG, Users, Store, Menu (with sub-links All Menus and Add Menu), and Orders. The main area is titled 'Dashboard' and contains a sub-section titled 'Add Menu to Restaurant'. The form fields are as follows:

- Dish Name: The Crispy Crust Pizzeria
- About: Crispy Crust is not a Gluten-Free Environment. Specials.
- price: 11.33
- Image: Choose File pizza.png
- Select Category: The Great pizza Factory

At the bottom are two buttons: a teal 'save' button and a black 'Cancel' button.

AFTER SUCCESSFULLY ADDED THE NEW MENU :-

This screenshot shows the same interface after a successful addition. A green banner at the top of the 'Add Menu to Restaurant' section reads 'Congrats! New Dish Added Successfully.' The rest of the form fields and layout are identical to the previous screenshot, showing the same menu details: Dish Name (The Crispy Crust Pizzeria), About (Crispy Crust is not a Gluten-Free Environment. Specials.), price (11.33), Image (Choose File pizza.png), and Select Category (The Great pizza Factory). The 'save' and 'Cancel' buttons are also present at the bottom.

UPDATE THE MENU :-

The screenshot shows the 'Dashboard' section of the eLaAdmin application. On the left, there is a sidebar with navigation links: HOME, Dashboard, LOG, Users, Store, Menu (with 'All Menus' and 'Add Menu' options), and Orders. The main area is titled 'Add Menu to Restaurant'. It contains fields for 'Dish Name' (The Crispy Crust Pizzeria), 'About' (Crispy Crust is not a Gluten-Free Environment. Specials.), 'price' (11.33), 'Image' (Choose File pizza.png), 'Select Category' (The Great pizza Factory), and two buttons at the bottom: 'save' (highlighted in green) and 'Cancel'.

AFTER SUCCESSFULLY UPDATED THE NEW MENU :-

The screenshot shows the same 'Add Menu to Restaurant' form as the previous one, but with a green header bar indicating 'Record Updated.' The rest of the form fields and layout are identical to the first screenshot.

LIMITATIONS :-

Although I have put my best efforts to make the software flexible, easy to operate but limitations cannot be ruled out even by me. Though the software presents a broad range of options to its users some intricate options could not be covered into it; partly because of logistic and partly due to lack of sophistication. Paucity of time was also major constraint, thus it was not possible to make the software fullproof and dynamic. Lack of time also compelled me to ignore some part such as storing old result of the candidate etc. Considerable efforts have made the software easy to operate even for the people not related to the field of computers but it is acknowledged that a layman may find it a bit problematic at the first instance. The user is provided help at each step for his convenience in working with the software.

List of limitations :-

- This application will only run in Windows Operating System.
- This application does not provide automatic recovery and backup feature.
- The transactions are executed in off-line mode, hence the invoice payment receipt are not generated right now.
- The order is cancelled the cancel receipt of the food is not generated right now.

Conclusions :-

Our project is only a humble venture to satisfy the needs to manage their project work. Several user friendly coding have also adopted. This package shall prove to be a powerful package in satisfying all the requirements of the school. The objective of software planning is to provide a frame work that enables the manager to make reasonable estimates made within a limited time frame at the beginning of the software project and should be updated regularly as the project progresses.

- Paper Work is removed as far as possible.
- The information of customer's customer's orders, cancellation, payment and refund (if any) are collected, stored and updated efficiently.
- Reports of information of customer's order, payment their menu, are generated quickly.
- Daily income information of customer's is ascertained.
- Monthly income information of booked orders of customers is ascertained.
- Daily orders and events order's and information is maintained efficiently.
